Discera, Inc. Receives ISO 9001:2008 Certification

San Jose, CA (22 July 2009)—Discera (<http://www.discera.com>) is the first MEMS oscillator supplier to receive ISO 9001:2008 certification for its Quality Management System, clearly demonstrating their commitment to meeting globally recognized management system requirements and regulations for the design and sale of semiconductor components around the world.

“Achieving ISO 9001:2008 certification is an important milestone for Discera. This certification illustrates to customers worldwide our strong commitment to quality at all levels of our organization.” said Bruce Diamond, president and CEO. “Customers want to be confident that they are doing business with an organization that can meet or exceed their needs in a timely manner. Successfully completing the rigorous process required for certification is a clear sign that we are devoted to continually improving our quality management systems.”

The successful ISO certification was made through BSI Management Systems, an accredited registrar that performs assessments of management systems against requirements of national and international standards for quality.

About Discera

Founded in 2001 as an extension of pioneering MEMS development work at U. of California at Berkeley and U. of Michigan at Ann Arbor, Discera is a recognized leader in MEMS oscillator technology. The company has 27 MEMS technology patents. Discera was presented with the

prestigious Wall Street Journal Innovation Award, and the company's CTO has garnered the coveted ACE Award for his work on MEMS technology.

Discera's products are used in a wide variety of electronic systems, and the company's MEMS oscillators were the first such devices to be catalog listed by a major distributor. More information about the company can be obtained on its website: <http://www.discera.com>.
